Available: 1 Month Notice | English: B2 (Professional Working Proficiency)

PROFESSIONAL SUMMARY

Senior SQA Engineer with 6+ years in testing and QA, from manual testing to Lead QA for the customer solutions Scrum team of an enterprise retail POS platform used by large retail chains in the Nordics, Greenland, Germany and Poland. I lead the full test automation process and built an agentic Playwright system of 13 AI agents, 8 skills and a role-based MCP server, with the POS running in Docker and Jenkins CI. Cut the Europris release cycle from 2 weeks to 4 days and critical production defects by 28%. Experienced in test strategy, shift-left QA, UAT, mentoring and reporting quality metrics to the CTO and product leadership, with daily remote collaboration with European teams.

SKILLS

Leadership: QA team lead, test planning, task delegation, work review, mentoring, quality metrics, stakeholder updates, release go/no-go

Test Automation: Playwright, TypeScript, Cypress, Cucumber (BDD), Python, regression automation

AI in Testing: AI agents and skills, MCP servers, AI-assisted test design, prompt design

CI/CD and Environments: Jenkins (pipeline design and ownership), Docker, Bitbucket, Git, GitHub, Linux

API and Performance: Postman, REST API testing, Swagger, Apache JMeter (load and stress testing)

Test Management: Testmo, TestLink, Jira, Confluence, Redmine, test plans, test strategy, test case design and review

Quality Process: Shift-left QA, risk-based testing, process optimization, issue management, root cause analysis, UAT, Agile (Scrum, Kanban), SDLC, STLC

Domains: Retail POS and payments, e-commerce and marketplaces, EdTech (LMS), ERP, government workflows, hospitality

PROFESSIONAL EXPERIENCE

Fiftytwo Digital Limited | Dhaka, Bangladesh **Oct 2022 – Present**

Enterprise retail POS (52ViKING). Remote collaboration with Scandinavian clients and cross-functional teams, 4+ hours daily CET/CEST overlap.

Senior SQA Engineer, Lead QA, Customer Solutions Scrum Team **Nov 2024 – Present**

- Lead QA for the customer solutions Scrum team and guide the core product team's QA member.
- Lead the full automation process: planning, task delegation and reviewing team members' work.
- Single-handedly converted Standard, Europris and Flugger from manual regression to E2E automation.
- Built an agentic Playwright automation system: 13 AI agents, 8 skills and a role-based MCP server, with the POS in Docker.
- Built and run the Jenkins CI pipeline: PR builds of changed tests, nightly full suites, Testmo upload and reports.
- Moved Europris to E2E and cut its release cycle from 2 weeks to 4 days; the other projects are in progress.
- Replacing 30–50 hours of manual regression per monthly Standard release and per customer project with E2E and CI.
- Led QA for the Klarna payment integration for Kicks in Norway.
- Represent QA in sprint planning, backlog refinement and release go/no-go decisions; present quality metrics to the CTO, Product Lead and QA Manager.
- Run UAT sessions with stakeholders and debug system logs to speed up root cause analysis.

SQA Engineer **Oct 2022 – Oct 2024**

- Sole QA for Europris and Flugger from first sketch to delivery; designed 3,000+ manual test cases and test scenarios.
- Tested Standard core features and work for Preem, Bauhaus, Pisiffik, Kicks, Netto DE and Netto PL (Salling Group).
- Led QA for Verifone P630 (PSDK) certification on the core POS standard features, in the scope Verifone defined, then its integration into the Flugger and Kicks solutions with their extended features.
- Introduced Testmo as the single test management platform in place of scattered files.
- Cut critical production defects by 28% by bringing shift-left practices into the team.
- Mentored QA engineers and raised the team's output quality by 20% through process changes.
- Reviewed peers' test cases and coordinated testing across the QA team.

Intellier Limited | Dhaka, Bangladesh **Dec 2021 – Sep 2022**

QA Engineer

- Owned requirement analysis and test design for assigned modules, raising test coverage by 35%.
- Helped restructure the release process for 20% faster sprint delivery in Agile and Kanban.
- Added REST API testing with Postman, cutting integration failures by 15%, and performance testing with JMeter.
- Improved defect reporting standards in Redmine and tracked defect metrics and feature dashboards.
- Owned the full QA lifecycle of the Payra Port requisition system, including UAT with the client's stakeholders.

Bdtask Limited | Dhaka, Bangladesh **Jun 2020 – Nov 2021**

Jr. SQA Engineer

- Designed and ran 2,000+ test cases (functional, regression, exploratory), raising module-level coverage by 30%.
- Did cross-browser and cross-platform testing, cutting UI and functional issues by 22%.
- Cut the defect reopen rate by 18% with stronger verification and follow-up testing.
- Wrote clear, reproducible defect reports and supported UI/UX usability reviews.
- Ran smoke, functional and regression tests on every release, and took part in UAT sessions for the LMS.

KEY PROJECTS

52ViKING Retail POS | Enterprise retail POS | Fiftytwo Digital | 2022 – Present

- **Flugger POS (2024 – 2025):** sole QA for a custom POS used in 300+ stores across 5 countries: quotations, B2B account payments with credit balance and customer type checks, multi-level discounts for B2B accounts and sub-accounts, campaigns, Poland compliance and fiscalization, Verifone P360 terminal.
- **Europris POS (2023 – 2024):** sole QA for the Europris POS solution, used in 250+ stores in Norway: sales, returns, receipts and bookkeeping, DealEngine discounts, including card-token discounts, loyalty, customer registration, invoice and account payments, Verifone P400 terminal.
- **Netto PL merge to standard (2025):** tested the whole solution (POSNet and Innova fiscal printers, Polcard and LAN300 EFT terminals, service charge, employee and gift card discounts, comeback and bottle vouchers, NIP tax ID) and rebuilt the manual test suite from scratch.
- **Netto DE weight scale (2026):** tested a weight scale integrated with the POS for Netto Germany (Salling Group): sales of weighed items from the scale, returns of weighed items with dynamic pricing, receipts, logs, and verification of the related store service system changes.
- **Payments:** Verifone P630 (PSDK) certification on the core POS and customer integration, Klarna for Kicks, Swedbank Pay PAX A35 for Preem (Nexo Retailer), Vipps MobilePay, SwissPay and Softpay.
- **Gift cards and loyalty:** Retain24 for Preem (500+ stores), iGive for Europris, a new Bauhaus loyalty feature (7 countries), Pisiffik loyalty points to discounts (Greenland).

Earlier projects

- **Payra Port Requisition System** (Intellier): approval workflows, role-based access and multi-level routing; functional, integration and UAT plans.
- **Pharma ERP** (Intellier): inventory, supply chain, production, procurement and distribution end to end; batch tracking, expiry and regulatory workflows; 300+ test cases.
- **Nidle Smart Factory** (Intellier): real-time apparel shop-floor production tracking.
- **Lead Academy LMS, multivendor e-commerce, manufacturing ERP and restaurant POS** (bdtask): enrollment, certification and payments; catalog to vendor payouts; six ERP modules; table booking, kitchen display, billing and tips.

EDUCATION

B.Sc. in Computer Science and Engineering | University of Information Technology and Sciences (UITS), Dhaka **2015 – 2019**
